

AHS

December 21, 1983

Dear Customer:

BKK Corporation has been providing your organization with waste management and disposal services for a number of years and wishes to assure you of the continued availability of these services throughout the foreseeable future.

In order to dispell any erroneous impressions which may have been created in a recent trade journal newsletter that our Class I disposal site in Los Angeles County is experiencing containment problems, we are herein sharing with you, excerpts from the December 20, 1983 agreement executed by BKK and the California State Department of Health Services.

The purpose of the agreement is to formalize continued evaluation of the site in relationship to current disposal practices.

The preamble of the Agreement reads as follows:

"Although there is no present evidence that the BKK Class I facility has contaminated soil or groundwater off site or presents an endangerment to the environment or public health, the parties agree that it is in their mutual and the public interest to pursue an orderly investigation for methods by which preventive measures can be continually improved at the BKK Class I facility."

BKK additionally intends to provide pre-disposal treatment of certain waste streams at the disposal site in order to comply with regulations governing ignitable and reactive waste streams.

For further information, please feel free to contact Joe Fulton at (213) 965-0911.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Kenneth B. Kazarian', is written over a horizontal line.

Kenneth B. Kazarian
